

## Protection packaging

The Dust Cover pouch is a packaging allowing protection from shocks and dust during the phases of transport and storage.

Dust Cover is a simple and economical solution when conditions in the storage area and or transport are not optimized.

Used for the overpack of pouches, reels or packs for surgery, Dust Cover also offers a suitable protection to delivery and storage for health care services. Its openness and self-adhesive closure allows users to open and close the pouch several times. Dust Cover has 2 polypropylene transparent film sides for viewing content and a space reserved for identification.

## Specifications

- Transparent 50 µm polypropylene film
- High quality self-adhesive closure
- Sizes adapted for the overpack
- Good mechanical strength
