

NEW!

Elastigrip™

Now, the brand professionals trust offers you a choice line of compressive elasticated bandages.

Ideal for a wide range of applications:

Orthopedic usage

- Use for support and aid in rehabilitation after removal of plaster casts and for joints in functional casts.
- Helps to keep limbs warm after therapeutic massages.
- Provides greater comfort for rheumatic conditions.
- Ideal to support amputation stumps.
- Recommended for treating work and sports injuries, sprains, bruises and dislocations.

Vascular applications

- Helps to relieve swelling and assists venous circulation for treatment of varicose veins.

Plastic surgery & traumatology

- Use for prevention and treatment of hypertrophic scarring, edemas and hematomas.
- Helps to maintain medication and dressings in place following a mastectomy or reconstructive plastic surgery.

Featuring user-friendly packaging

- Size indicated on multiple surfaces for easy identification.
- Push tab is easy to perforate with fingers to create a dispensing slot.
- Dispensing side features a body silhouette with colored areas that represent where Elastigrip size can be applied.
- A summary table of all sizes, along with their corresponding body part coverage, appears on the back panel.

NEW!

Elastigrip™

Skin Friendly

- Elastigrip bandages allow skin to perspire comfortably.
- Each filament is double insulated to help prevent skin irritation.

Autoclavable and Washable

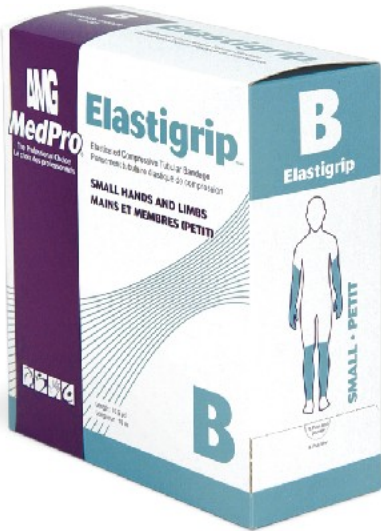

- Elastigrip compressive bandages can be reused and/or sterilized without losing elasticity.

Variety

- Elastigrip is available in a wide range of sizes to provide quick and easy compression to the body area that needs it.

Freedom of movement

- A practical alternative to traditional compressive dressing systems.
- Elastigrip exerts gradual, consistent compression while permitting freedom of movement.
