

# CAROLON

## ANTI - EMBOLISM STOCKING SYSTEM

### FITTING

Careful measurement and correct size selection is critical.

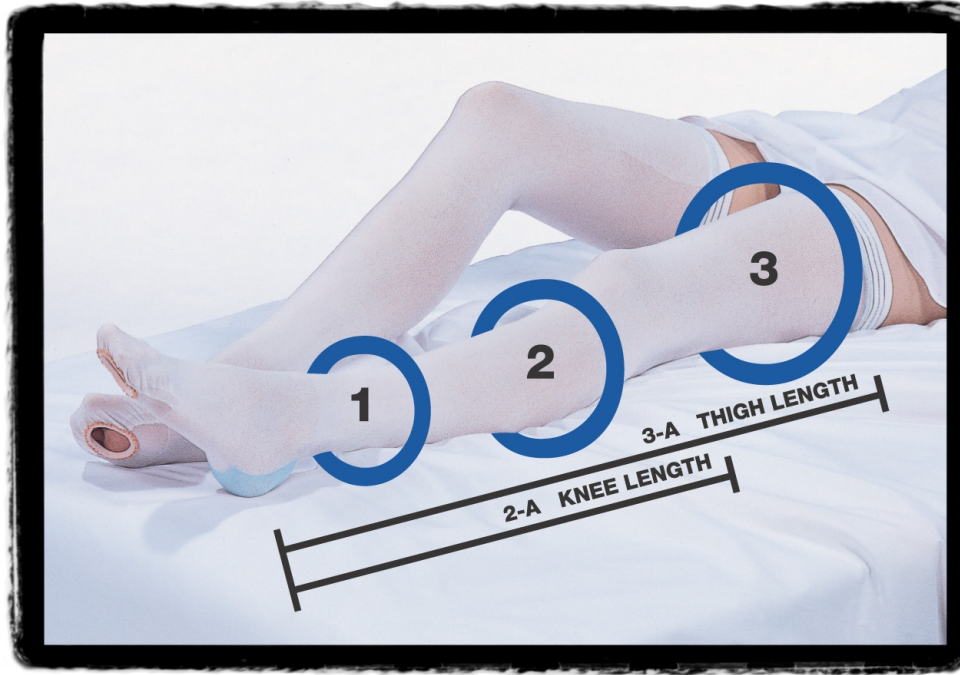

#### KNEE LENGTH

1. Measure narrowest ankle circumference. Use the ankle to determine proper size.

2. Measure largest calf circumference. If calf circumference indicates a larger size than the ankle measurement, select the larger size stocking.

2A. Measure distance from bend in knee to bottom of heel for length.

Refer to chart for size.

#### THIGH LENGTH

1. Measure narrowest ankle circumference. Use the ankle to determine proper size.

2. Measure largest calf circumference. If calf circumference indicates a larger size than the ankle measurement, select the larger size stocking.

3. Measure largest thigh circumference. If thigh circumference exceeds 30" (76 cm), refer to ATS Style.

3A. Measure distance from gluteal crease to bottom of heel for length.

Refer to chart for size.

Carolyn stockings deliver graduated compression beginning with 18 mmHg compression at the ankle.

NO LATEX

### APPLICATION

1 Put your hand inside the foot area of the stocking.

2 Turn stocking inside out, stopping at heel. Spreading fingers, leave foot area of stocking over the palm of your hand.

3 Stretching heel area side-ways, fit stocking over patient's foot and heel. Be sure patient's heel is in center of stocking's blue heel pocket.

4 Grasp top of stocking and pull over foot and ankle. Work stocking up over leg. Smooth out wrinkles. Make sure knit change at ankle is located at the ankle rotation.

5 For thigh stocking turn gusset over femoral. Insert finger in foot inspection hole and pull up, properly positioning fabric over foot, relieving possible pressure on toes.
