

Floravi Steri-Clean

Approved by **Health-Canada**, Steri-Clean is an antiseptic cleaner for the skin and for personal objects which kills bacteria and damaging germs.

Why use Steri-Clean?

- To clean intimate products :

Easy to use and hypoallergenic, Steri-Clean is an essential because it is important to clean its erotic accessories before and after their use for sexual health. Dust, bacteria or other contaminants may cause problems if they are in contact with female genitals. Thus, any object in contact with genitals must be properly cleaned with Steri-Clean, which is designed to remove any element that may be harmful to female sexual health.

- To clean women's genitals :

Containing no alcohol, Steri-Clean is ideal to gently clean the external genitalia of women, while helping to eliminate bad odors.

** Important note: Steri-Clean must be used for external genital area only, just like soap.*

When to use Steri-Clean?

It is important to clean your intimate products **before** and **after** each use. As it is easy to use, Steri-Clean fits well in your routine.

How to use Steri-Clean?

To properly clean your intimate product, simply spray the cleaner on it; making sure the entire surface is covered. Thereafter, wait about a minute and then rinse it under water. If necessary, wipe it with a clean fabric.
